

Vienna Chapter

FOREIGN POLICY AND UNITED NATIONS
ASSOCIATION OF AUSTRIA

The massive risks connected with a rapid warming of the earth's atmosphere pose an unprecedented challenge to global governance. The Copenhagen Climate Change Conference has shown the international community not yet fully able to provide an effective response, and it remains to be seen whether it can do better by the time of the next major UN Climate Change Conference in Mexico later this year.

The Vienna Chapter of the Society for International Development - SID, the Foreign Policy and United Nations Association of Austria - UNA-AUSTRIA and the International Institute for Applied Systems Analysis - IIASA, thus invite you to a presentation by three IIASA experts, each of them deeply involved in the analysis of climate data and in the modeling of feasible remedies against climate change.

Discussion on:

Climate Change - Looking beyond Copenhagen

17 May 2010 at 6 p.m.

UNA-AUSTRIA - Club

Hofburg/Stallburg, Reitschulgasse 2/2. OG, 1010 Vienna

PROGRAM

- **Fabian Wagner**, Senior Scholar in IIASA's Atmospheric Pollution and Economic Development Program, on: "The Road from Bali to Cancun: High Expectations, Low Results?"
- **Joanne Bayer**, Leader of IIASA's Risk and Vulnerability Program (and Lead Author at the Intergovernmental Panel on Climate Change), on: "Adaptation and Insuring the Most Vulnerable"
- **Florian Kraxner**, Deputy Leader of IIASA's Forestry Program, on: "What can Biosphere Management Contribute?"

Each of the three presentations will be followed by a short period of questions; and after the last presentation the three panelists will jointly answer broader questions posed by the audience.

Refreshments will be offered thereafter by the Foreign Policy and United Nations Association of Austria.

Please register early under:

office@oegavn.org

as the capacity of the UNA-AUSTRIA Club at Hofburg is limited.
